2018 COLLECTION —

10th Anniversary

LS2 Helmets is pleased to announce our 10th anniversary. From the first consideration of this brand to today, this has been a work of passion, desire and effort to bring a better product and a better way of doing business to the world of motorcycling. From our factory in Guangzhou, to our world headquarters in Barcelona, Spain, to our offices in the U.K. and the United States, to our amazing distributors and partners in over 85 countries around the globe, LS2 has first and foremost been about creating and protecting dreams. 10 years in many ways seems like a very long time, and in others seems like only yesterday. As a brand, we have achieved and continue to achieve rapid expansion as "The Fastest Growing Helmet Brand in the World," with record setting growth, now protecting over 3,000,000 heads per year. This type of success can only come from the deep love of what we do, and the dedication and persistence of our beloved staff and partners. To all of our friends, fans, and those millions of people who use our products all over the world, we thank you for putting your trust in us. Without you there is no purpose. As from the beginning of this journey, we will give everything we have to continual improvement in our products and services, and we will strive to live up to the goal of "Always Ahead."

The LS2 logo, featuring the letters 'LS2' in a bold, italicized, sans-serif font. The 'L' and 'S' are connected, and the '2' is slightly separated. The logo is white against a red background.

LS2 RIDERS

LS2 Helmets is also racing, as it is sponsor of MotoGP riders attending the 2017 championship with first-level teams. Héctor Barberá and Loris Baz are teammates in the Reale Avintia Racing Team attending the Queen category riding two official Ducati GP16, while Isaac Viñales is attending his Moto2 championship with the Kalex of the SAG Racing Team. A very strong test on track expressing the hi-level and hi-strength of the LS2 helmets reflected in every day's helmet collections.

HÉCTOR BARBERÁ

MOTOGP ///

Born in Valencia, España, on november 2nd 1986, Héctor Barberá has a single purpose for this new year: to finish the MotoGP 2017 season among the fastest.

LORIS BAZ

MOTOGP ///

Born in France in February the 1st 1993. After some years in the World Superbike Championship, the young French rider Loris Baz this year will ride the Yamaha MotoGP of the Forward Racing Team.

R&D

Designer, engineers and technicians at R&D Center are all two-wheel lovers and they put their knowledge and passion in the design of each new model, to create more contemporary helmets with a look to safety and functionality. They spend a lot of hours to analyse every detail of shells and liners, resistance of the structure and comfort, aerodynamics and ventilation systems. Each step has the goal to develop a product in accordance with each potential user that requires from his helmet the maximum level of quality, comfort and style. This is the reason why LS2 can boast worldwide patents on special moulding materials and technical solutions. The ultimate touch on the development process is given by the creatives who, by interpreting the most current style and trends of the moment, propose a variety of graphics and colors able to satisfy a wide range of users, male and female, young and adult.

MULTY DENSITY EPS

To ensure good protection the helmet must fit your head to perfection, special attention should be paid to the shell shape design and materials to minimize the effects of a possible impact. It is key to obtain a perfect fit to your head from outside to inside, as well as the shell, the configuración of the EPS liner, which should match closely the human head shape.

COMFORT

LASER-CUT FOAM

Multy-density foam is cur using LS2's 3D Laser Technology and formed to fit the curves of the rider's face for a pleasant touch and comfort in the roads featuring the absence of hot spots.

COMFORT LINER

All LS2 helmets features a fully removable and washable comfort liner so you can keep it as fresh as new. Our anatomically correct cheek pads are cut using LS2's 3D Laser Technology for a perfect fit. We use hypoallergenic technical fabrics that wick moisture to help you to stay cool while you ride.

GRAPHICS

Today's collection presents twenty-five models belonging to Road Race and Road Touring, Urban Commuter, Urban Downtown and Urban Unlimited, Off Road and Mini segments, all presenting special features in terms of technic and look: elegant and sophisticated single mono graphics are alteranted with special effects on drawings and colors. A very special combine able to satisfy the 'fashion and trendy' sense of a worldwide market.

EFFECTS

The luminescent effect on the Orion graphic realized for the Vector, created with special stickers absorbing both natural and artificial light. The surface of the shell gradually returns its light in dark conditions, guaranteeing a 'shiny' visibility even in conditions of insufficient light. The chromed surfaces of the Arrow Indy graphic of the Valiant Chrome create a mirror effect seducing at first sight. The big advantage offered by this material is to reduce the glare and the warmth inside the helmet, keeping the user safe, comfort and freshness, even at very high climate conditions. The union between Matt and Gloss was born from a precise request to underline the beauty at touch of both materials.

NEW SHELL

FF353 **RAPID**

A basic shape for a total protection.

The new Rapid interprets the basic compromise between high level protection and easy design. This new helmet of the LS2 range is molded in HPTT, a mix of ABS giving a total safe structure with a very light weight, three shells, breath deflector, Class A visor and quick release system. This helmet is perfect to be used for daily rides in the city and really comfortable for mid-distance journeys.

FF313 VORTEX

The double-face of the elegance.

Vortex, the new incredible flip-up of the LS2 range, reaches and goes beyond the standards of elegance and comfort for a double face helmet. Brilliant and arrogant, the new Vortex looks to guarantee the maximum security and an excellent comfort to the users, but it doesn't disdain fashion and trends. Its strength 100% Carbon Fibre, the same used extensively in the aeronautical industry, Formula 1 and MotoGP, is expression of reliability but also of an absolute lightness, to make it the perfect helmet for the night and day, for the city streets or for a journey to the infinite.

FF324 **METRO EVO**

Bold. Innovative. Advanced. Modular.

LS2's Metro reimagines the possibilities of a modern, full-face modular motorcycle helmet. It starts with the aerodynamic shell built from our exclusive Kinetic Polymer Alloy (KPA). This super strong alloy offers exceptionally lightweight and a bit of flexibility for energy absorption with penetration resistance that rivals that of high-end composites. The Metro is dual-homologated as both a full-face and open-face helmet.

OF597 **CABRIO C**

Attitude & style.

An innovative and beautiful open face motorcycle helmet, the Cabrio combines technology, urban lifestyle and fashion.

The shell is a work of art, made from LS2's wide weave carbon fibre on the premium version, or HPFC for a light-weight, stylish and fun option with great colours to choose from. The security of the shell combined with outstanding details, such as an optional long visor and transpirable leather lining make Cabrio the best provider of individual style in an advanced open face design.

OF583 **BOBBER**

For free spirits.

Retro is in. The classics are back. This is a helmet with a vintage design that goes perfectly with that special style and with the way we get around in this day and age. Bobber offers, in addition to its design, unparalleled quality in a reduced, comfortable size, with a certified HPFC shell and padded interior lining. This helmet has a peak and aviator style goggles included with all its attractive models to make it a unique, original piece.

NEW SHELL

MX470 **SUBVERTER**

Top level off-road performance.

In the wild world of the motocross helmets, a new star is born today: its name is Suberverter. 'Nomen omen' Latin stated, and the new off-road model of the LS2 range represents the perfect expression of the name thanks to its extreme and absolute innovating specifics looking to comfort, safety and look. Made with the ultra-light KPA, the new Suberverter is offering, above all, a security sliding structure with a double injection of EPS, to guarantee an exceptional protection on impacts. Suberverter is ready to fight for new big and dusty challenges on the head of the motocross riders all over the world!

MX436 **PIONEER**

Build your own adventure.

A new approach to the adventure motorcycle helmet category, the Pioneer leans heavily on LS2's successful Rally experience and offers the rider everything they need, and nothing they don't for serious, dirt-focused adventure riding.

MX437 **FAST**

Go hard or go home.

Perhaps the best value on the market in a lightweight, MX helmet, LS2's Fast is a mighty weapon for serious off road riders. The shell is made from our technically advanced Kinetic Polymer Alloy (KPA). This innovative material is ultra-lightweight and offers a bit of energy absorbing flexibility, but with a penetration resistance that rivals high-end composites.
